Creation of 3Shape R&D Center/Utworzenie Centrum B+R 3Shape

Project aim and effects: The aim of the project is to create a 3Shape R&D Center in Poland, which will systematically conduct research and development in the field of medical devices. The most important effect of the project will be the development of improved, cost-effective, state-of-the-art solutions in the field of CAD/CAM scanners and technologically advanced high-tech products in the field of medical devices. The project will result also in increase in R&D employment and expenditures.

Project timeline: 2016-2020

Project budget: PLN 4 836 473,59

European Funds Input: PLN 1 108 422,43

Let's change dentistry together
